# Electronic Procurement Software Package (EP)

What is EP?

Over the last two years **Cape York Digital Network Pty Ltd (cydn)**, the largest remote IP network provider in Queensland and a recognised MYOB developer, has built, trialled, tested and implemented to clients, it's software package called **Electronic Procurement** or **EP**.

EP interfaces directly into your MYOB accounting software to electronically generate purchase *requests* for traceable *approvals* into purchase *orders*.

EP allows budget control, *traceability* and a selection of other management reports BUT your MYOB accounts remain the reference for all transactions and accounting.

An example of EP in action

Why EP?

EP was initially built by **cydn** from the ground-up listening to what our users and financial staff required to fulfil a business demand.

The business demands were remote and distanced users and operations needing secure access to financial services and processes and records over the **cydn** network.
It had to be reliable, secure, easy to use and could be customised to multiple situations.

It soon became apparent that EP was addressing common issues for small to medium sized business, associations and organisations with scattered and diversified staff and activities.

Who is EP for?

EP is a cost-effective software solution for small and medium sized companies that need to automate and streamline their purchasing process.

It is for any organisation or business and is particularly applicable for remote staff and branch offices.

EP Benefits

- EP provides the benefits of an easy to use, fast and trouble-free system.

- EP streamlines your purchasing process, controls spending, reduces paperwork and complies with audit requirements.

- EP writes directly to/reads directly from MYOB.

- EP gives you the ability to create, approve and manage the purchasing process.

- EP allows remote access to the requisitioning and ordering process.

- EP offers improved budget control.

- EP provides a range of management reports covering requestor, supplier, order status, transaction log, etc.

- EP can be customised to your individual company profile and needs.

PURCHASE ORDER   **BUDGET**   **ACCOUNT**   **REPORT**

Welcome to Cape York Digital Network Pty Ltd

Information technology is a vital part of an organisation's operations so choosing the IT service provider for your organisation can be a daunting task. Do they have the experience to meet your requirements? What do their clients say about their performance? When you choose technical support from *cydn* you can be sure of the highest standards in professionalism and that our technicians strive to meet service standards 100% of the time.

cydn pty ltd (Cape York Digital Network Pty Ltd) located in Cairns, Queensland, has been providing customised ICT turn-key solutions for customers for over 10 years. Our customer base includes government and corporates, medium sized businesses and not-for-profit organisations.

cydn specialises in regional and remote solutions. It owns and manages one of North Queensland's most complex and largest private data warehouse/server farm facility and has the largest remote IP network in Queensland.

From its Network Operations Centre (NOC) in Cairns *cydn's* technical staff provide clients with professional service for day-to-day technical operational faults and support as well as managing higher level ICT issues.

cydn's data warehouse and server farm is an intense capacity virtual server's environment, linking back into our extensive SAN infrastructure. *cydn* provides both cloud computing and virtual dedicated servers for data and applications with snapshot and full disk, folder and file backups to disk and tape.

cydn services and products include:

- Internet Services and Email Services;
- Data Warehousing;
- Web and Applications Hostings;
- Software Development;
- Wireless Services;
- Video Conferencing;
- IT support and Maintenance;
- Network Management and Managed Services;
- ICT Consultancy and Contracting Services; and
- Systems Integration.

cydn pty ltd is accredited as a signatory to the GITC Framework – Version 5 in the State of Queensland.
